#### SECTION 4 FIRST AID MEASURES

#### First Aid Measures:

#### **Inhalation:**

If symptoms are experienced, move victim to fresh air and obtain medical advice.

#### **Ingestion:**

Rinse mouth. Drink 1 or 2 glasses of water. If irritation or discomfort occurs, obtain medical advice immediately.

## Eye:

Do not allow victim to rub eye(s). Flush with lukewarm, gently flowing water for 5 minutes or until particle is removed. If irritation persists, obtain medical attention.

#### Skin:

Wash with soap and water. If irritation persists, obtain medical advice.

#### Note to Physicians:

None

#### SECTION 5 FIRE FIGHTING MEASURES

# **Fire Fighting Measures:**

## **Extinguishing Media:**

CO2, water, dry chemicals

# **Unsuitable Extinguishing Media:**

None

# **Special Fire Fighting Procedures:**

None

## **Unusual Fire and Explosion Hazards:**

Can form explosive dust-air mixtures when finely dispersed in air.

## Fire and Explosive Properties (See also Section 9):

# **Hazardous Combustion Products:**

CO2, CO

# **Other Properties:**

Not available

# SECTION 6 ACCIDENTAL RELEASE MEASURES

## **Personal Precautions:**

Avoid breathing dust.

## **Environmental Precautions:**

Do not wash away into sewer.

# Method for Cleaning Up:

Sweep slowly spilled powder on to paper, and carefully transfer into a waste container. Clean remainder with wet paper, wet cloth or a vacuum cleaner.

If a vacuum cleaner is used, it must rate as a dust explosion-proof type. Fine powder can form explosive dust-air mixtures.

# SECTION 7 HANDLING AND STORAGE

#### Handling:

Avoid breathing dust.

Use with adequate ventilation.

# Storage:

Keep out of the reach of children.

Keep away from oxidizing materials.

## **Specific Uses:**

Toner for electrophotographic apparatus.

	ck as a Group 2B carcinogen, for which there is inadequate human evidence, but		

The IARC evaluated carbon black as a Group 2B carcinogen, for which there is inadequate human evidence, but sufficient animal evidence. The latter is based upon the development of lung tumors in rats receiving chronic inhalation exposure to powdered carbon black at levels that induce particle overload of the lung. However, there is a two-year inhalation study of a toner containing carbon black which demonstrated no association between toner exposure and tumor development in rats.

## Others:

Chronic effects: Muhle et al. reported pulmonary response upon chronic inhalation exposure in rats to a toner enriched in respirable-sized particles compared to commercial toner.

No pulmonary change was found at 1 mg/m³ which is most relevant to potential human exposure.

A minimal to mild degree of fibrosis was noted in 22% of the animals at  $4 \text{ mg/m}^3$ , and a mild to moderate degree of fibrosis was observed in 92% of the animals at  $16 \text{ mg/m}^3$ .

These findings are attributed to "lung overloading", a generic response to excessive amounts of any dust retained in the lung for a prolonged interval.
